Jemez Technology Corporation

## FEATURES

- i** Detects what the human eye cannot.
- i** Alerts of an alarm condition via console monitor and speaker, PA system, rotating lights, makes a phone call, or send image to cell phone or other remote location.
- i** Detection range is accurate regardless of the distance and short or wide area of surveillance.
- i** Accurate, automatic PTZ pointing gives the operator a close-up view of what the alarm is.
- i** Hands-free tracking of the alarm through the camera field-of-view.
- i** PTZ hand-off of object being tracked to next wide field-of-view camera.
- i** Automatic instant record with instant playback (zero search time).
- i** Monitors the area without human operator.
- i** Reduced operating cost.

People can not stare at a monitor more than 22 minutes. \*

Automatic detection and reporting of  
alarm condition.

\* SANDIA National Laboratory Study

LOS ALAMOS, NEW MEXICO

**ACCURATE AUTOMATIC POINT AND TRACK TELEPHOTO CAMERA**
